GCC Edition

Team Name : CoCo Team

Team Leader Name : Marka Manideep

Team Size : 1

Problem Statement : Insure360 AI: Unified Customer 360 & Next Best Action Copilot

Executive Summary

A judge-ready view of the problem, solution, innovation and outcome

PROBLEM: Fragmented context

Agents switch across policy, claims, payment and interaction records before deciding how to respond.

SOLUTION: One workspace

Customer 360, timeline, analytics, AI insights and action workflow in one Streamlit experience.

INNOVATION: Structured + unstructured AI

Cortex AI turns operational data and call transcripts into briefs, grounded Q&A and recommendations.

OUTCOME: Governed action

Explainable rules recommend the next step; approval and audit history retain human control.

Understand the customer faster. Explain what matters. Take the next best action.

1. Problem Brief

Why insurance teams need a unified, decision-ready customer view

1

SEARCH

Customer facts are distributed across operational systems.

2

ASSEMBLE

Agents manually connect policies, claims, payments and interactions.

3

INTERPRET

Call transcripts are difficult to consume during a live decision.

4

DECIDE

Follow-up action varies by individual interpretation.

THE OPPORTUNITY Make customer context immediately usable

✓ Unified customer history ✓ Explainable AI-assisted insight ✓ Repeatable next-action workflow

2. Solution Overview

Monitor → Understand → Assist → Act

MONITOR

Portfolio risk, claims, payments and renewals

UNDERSTAND

Customer 360 profile and journey timeline

ASSIST

AI executive brief, interaction digest and grounded Q&A

ACT

Explainable NBA, approval and audit trail

One workspace. One customer story. One informed next step.

3. Architecture

A modular Snowflake-native flow from structured and unstructured data to action

4. CoCo CLI Across the Full Lifecycle

Cortex Code served as the implementation partner from planning through deployment

PLAN

Architecture, data model, gap analysis and phased roadmap.

BUILD

SQL views, synthetic data, semantic model, agent and Streamlit code.

VALIDATE

Referential integrity, KPI realism, NBA and anti-hallucination tests.

DEPLOY

Stage upload, app creation and runtime compatibility fixes.

9 generated artifacts • 14/14 validations • 8 deterministic rules • deployed Streamlit app

5. Prototype: Monitor the Portfolio

Risk and operational signals are visible before the next customer interaction

24 customers

79.9% loss ratio

94.6% on-time pay

5 renewals

Risk + segment visibility

6. Prototype: Understand the Customer

Profile, value, risk and journey events in one decision view

Customer 360 profile

COUNT	AVG_HEALTH	AVG
6	89.9	
7	63.7	
6	62	
5	51.3	

Health • Churn • Sentiment

Value • Claims • NPS

Customer journey timeline

7. Prototype: Decide and Act

Explainable recommendations become approval-ready, auditable actions

×

Customer Copilot

Ask questions about customers, policies, claims, and recommendations. Grounded in verified data — answers are generated from real Customer 360 queries.

You: What is our fraud exposure?

Insure360 AI:

Based on the data, our fraud exposure is as follows:

- Total customers with fraud flags: 1 (CUST-003 Emily Chen)
- Total customers with high fraud scores (> 50): 1 (CUST-003 Emily Chen with a MAX_FRAUD_SCORE of 78.5)
- Total potential loss due to fraud: \$12,100 (LIFETIME_VALUE of CUST-003 Emily Chen)

Note that this is a limited view of our fraud exposure, as we only have data on a subset of customers.

You: Show me all platinum customers

Insure360 AI:

Here are the Platinum customers:

- CUST-001 - Sarah Mitchell
 - Customer Segment: PLATINUM
 - Churn Risk: LOW
 - Customer Health Score: 86.5
 - Total Annual Premium: \$5,400.00

Risk + business impact

Priority + action

Verified context

Graceful fallback

9. Impact and Scale

Expected value today, with a path from prototype to operational adoption

FASTER UNDERSTANDING

A single workspace reduces manual context gathering before customer engagement.

CONSISTENT DECISIONS

Explainable NBA rules and AI briefs create a repeatable servicing experience.

EARLIER RISK RESPONSE

Portfolio and customer signals surface churn, payment, fraud and claim risk.

Prototype proof points

24 customers	34 policies	15 claims	244 payments
30 transcripts	328 events	37 NBA actions	8 rules

Scale beyond the demo

- Connect CRM and service systems through MCP
- Automate data-quality and risk refreshes
- Learn from approved actions and outcomes
- Extend the semantic model across products
